

TYPE APPROVAL CERTIFICATE

This is to certify:**That the Maritime Computer**with type designation(s)
PPC-240T-HW-01 Maritime Panel ComputerIssued to
Data Respons Norge AS
HØVIK, Norwayis found to comply with
DNV GL rules for classification – Ships, offshore units, and high speed and light craft**Application :****Product(s) approved by this certificate is/are accepted for installation on all vessels classed by DNV GL.****Location classes:****Temperature B***
Humidity B
Vibration A
EMC B
Enclosure A
*** Tested at -15°C**This Certificate is valid until **2021-10-27**.Issued at **Høvik** on **2016-10-28**DNV GL local station: **Station Oslo Maritime and CAP**Approval Engineer: **Nils Jarem**for **DNV GL**

Odd Magne Nesvåg
Head of Section

This Certificate is subject to terms and conditions overleaf. Any significant change in design or construction may render this Certificate invalid. The validity date relates to the Type Approval Certificate and not to the approval of equipment/systems installed.

Product description

PPC-240T-HW-01: 24" MARITIME PANEL COMPUTER

The panel computer is a rugged low power touch-computer designed and certified for maritime and offshore applications. The computer is based on an Intel® Core™ i5 (optional Core i7) Ultra Low Voltage CPU, SSD storage with no rotational parts and up to 16GB DDR3 memory. This allows a fan-less minimalistic design with low power consumption. The wide viewing angle LCD display with multi-touch capacitive touch, gives the users an elegant and flexible user interface.

Key Features:

- Intel® Core™ i5 ULV CPU (4300U) (Optional Intel® Core™ i7 (I7-4650U)
- Fanless rugged design
- 4x Gigabit Ethernet
- 4x USB
- 1x Serial port (RS-232/422/485)
- SSD storage
- Projected capacitive multi touch
- 16:9, WUGA 1920x1080 native resolution

Power supply: 115/230VAC – 50/60Hz + 24VDC (selectable by sliding a mains port protection slide)

Compass safe distances:

Standard: 150 cm
Steering: 100 cm

Tested firmware version: 4.6.5.4

Approval conditions

The Type Approval covers hardware listed under Product description. When the hardware is used in applications to be classed by DNV GL, documentation for the actual application is to be submitted for approval by the manufacturer of the application system in each case. Reference is made to DNV GL rules for classification of ships Pt.4 Ch.9 Control and monitoring systems.

Product certificate

If specified in the Rules, ref. Pt.4 Ch.9 Sec.1, the control and monitoring system in which the above listed hardware is used shall be delivered with a product certificate. For each such delivery the certification test is to be performed at the manufacturer of the application system before the system is shipped to the yard. The test shall be done according to an approved test program. After the certification the clause for application software control will be put into force.

Clause for application software control

All changes in software are to be recorded as long as the system is in use on board. The records of all changes are to be forwarded to DNV GL for evaluation and approval. Major changes in the software are to be approved before being installed in the computer.

Type Approval documentation

	Document:	Version:
Data sheet:	PPC-240T-HW-01	Revision A version 2
Manual:	5100063-900	Revision A Version 1 dated 2016-07-12
Test report:	E16161.00	00 / 2016-10-04

Tests carried out

Applicable tests according to class guideline DNVGL-CG-0339, November 2015.

Applicable tests for protected equipment according to IEC 60945, 4th edition (2002), except salt mist test (8.12).

Job Id: **262.1-024055-1**
Certificate No: **TAA00000UR**

Marking of product

Manufacture: Data Respons Norge AS
Model number: As listed under product description
Serial number: Unique for each delivered item
Power supply: 115/230VAC – 50/60Hz + 24VDC

Periodical assessment

The scope of the periodical assessment is to verify that the conditions stipulated for the type are complied with, and that no alterations are made to the product design or choice of systems, software versions, components and/or materials.

The main elements of the assessment are:

- Ensure that type approved documentation is available
- Inspection of factory samples, selected at random from the production line (where practicable)
- Review of production and inspection routines, including test records from product sample tests and control routines
- Ensuring that systems, software versions, components and/or materials used comply with type approved documents and/or referenced system, software, component and material specifications
- Review of possible changes in design of systems, software versions, components, materials and/or performance, and make sure that such changes do not affect the type approval given
- Ensuring traceability between manufacturer's product type marking and the type approval certificate

Periodical assessment is to be performed at least every second year and at renewal of this certificate.
